

Wilson, Phillips & Agin, CPA's, Inc. Internship Description

Our internships have some flexibility. We have tax and audit internships. They can start as early as mid-December or as late as February 1st. They can last through tax season (4/15) or go as late as the end of July, depending on the student's interest. All internships are paid and returning interns receive an increase in year 2 and year 3. We have openings in our Zanesville and Coshocton offices. The tax internship consists of inputting original documents into our tax software, scanning documents and possibly 1099 preparation. The audit internship consists of out of office and in office scheduling and testing of receipts and disbursements. In both internships the student will actually be working on tax returns and audits.
